Product Overview

Storage Camera: Micro SD card (not included, supported capacity: 64GB maximum)

Installation

Before installation, please make sure the camera is connected to power, and the indicator light is on. Place the camera in the desired location and adjust the angle. Ensure the camera's lens is free from obstructions and the surrounding area is well-lit.

Desktop Mounting

Place the camera on a flat surface, adjusting the lens angle as needed. For optimal performance, ensure the camera is positioned at a height of at least 1.5 meters (5 feet) from the ground.

Ideal for: Nurseries, offices, living rooms

Wall Mounting

1. Drill two holes in the wall using the drill bits and the mounting template provided. Insert the wall anchors into the drilled holes.
2. Secure the mounting base to the wall using the provided screws.
3. Attach the camera to the mounting base, adjusting the angle as needed.

Ideal for: Hallways, stairwells, outdoor areas

Ceiling Mounting

1. Drill two holes in the ceiling using the drill bits and the mounting template provided. Insert the wall anchors into the drilled holes.
2. Secure the mounting base to the ceiling using the provided screws.
3. Attach the camera to the mounting base, adjusting the angle as needed.

Ideal for: Large rooms, warehouses, high-ceiling areas

⚠ Warning:

- Ensure the wall or ceiling is strong enough to support the weight of the camera.
- **DO NOT PLACE THE CAMERA NEAR HEAT SOURCES OR IN DIRECT SUNLIGHT.**
- Avoid placing the camera in areas with excessive vibrations or high humidity.

Product Instructions

Charging the Camera

Connect the camera to a power source using the provided micro USB cable and power adapter.

1. Insert the micro USB cable into the camera's micro USB port.
2. Connect the other end of the cable to the power adapter.
3. Plug the power adapter into a standard electrical outlet.

Indicator Light

- Solid Green: Normal operation
- Solid Red: Charging
- Blinking Red: Network connection issue
- Blinking Green: Ready for pairing

Installing a MicroSD Card

Insert a micro SD card (not included) into the card slot on the camera. Ensure the card is properly seated and locked in place.

Restore Factory Settings

- Press and hold the reset button for 5 seconds to restore the camera to its factory settings.
- Release the button when the indicator light changes.

Install EZVIZ Home App

1. Download and install the EZVIZ App from the App Store or Google Play Store.
2. Create an EZVIZ account or log in to your existing account.
3. Tap the "+" icon in the app to add a new device.
4. Scan the QR code on the camera's lower cover.
5. Follow the on-screen instructions to complete the pairing process.
6. Name your camera and adjust its settings as desired.

Interface

Note: The interface of the app may vary slightly between different versions. Please refer to the latest version for the most accurate information.

Specifications

Camera Model: Mi Lab C30
Lens: 3.0mm, F2.0
Sensor: 1/2.7" CMOS
Resolution: 1080P
Frame Rate: 25FPS
Storage: Micro SD card (up to 64GB)
Connectivity: 2.4GHz Wi-Fi
Power Supply: 5V/2A
Operating Temperature: -10°C to 45°C (14°F to 113°F)
Operating Humidity: 10% to 90%
Dimensions: 100x100x100mm
Weight: 0.5kg (1.1lb)

Precautions

- Ensure the camera is installed in a stable and secure manner.
- Avoid placing the camera near heat sources or in direct sunlight.
- Do not attempt to disassemble or modify the camera.
- Use only the provided accessories and power adapter.
- Clean the camera lens with a soft, dry cloth.
- Avoid exposing the camera to extreme temperatures or humidity.
- Regularly check the camera's installation and connections.
- Keep the camera out of reach of children.
- Do not use the camera in areas where it may be subject to excessive vibrations.
- Ensure the camera is not obstructed by any objects that may interfere with its field of view.
- Regularly update the EZVIZ App to ensure optimal performance and security.
- Do not use the camera in areas where it may be subject to high humidity or water exposure.
- Avoid placing the camera near electromagnetic interference sources.
- Do not use the camera in areas where it may be subject to high temperatures or direct sunlight for extended periods.
- Ensure the camera's power cable is not pinched or damaged.
- Do not use the camera in areas where it may be subject to excessive dust or pollution.
- Regularly check the camera's firmware and software for updates.
- Do not use the camera in areas where it may be subject to unauthorized access.
- Ensure the camera's installation does not pose a tripping hazard.
- Do not use the camera in areas where it may be subject to high winds or strong vibrations.
- Regularly check the camera's installation and connections for signs of wear or damage.
- Do not use the camera in areas where it may be subject to high temperatures or direct sunlight for extended periods.
- Ensure the camera's power cable is not pinched or damaged.
- Do not use the camera in areas where it may be subject to excessive dust or pollution.
- Regularly check the camera's firmware and software for updates.
- Do not use the camera in areas where it may be subject to unauthorized access.
- Ensure the camera's installation does not pose a tripping hazard.
- Do not use the camera in areas where it may be subject to high winds or strong vibrations.
- Regularly check the camera's installation and connections for signs of wear or damage.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.
For Mobile Devices: This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. To maintain compliance with FCC RF exposure guidelines, this equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.

WEEE Information

CE: Conformité Européenne (European Conformity). This means that the unit complies with all applicable European Union (EU) directives.
FC: Federal Communications Commission. This indicates that the device has been tested and found to comply with the FCC standards for electromagnetic interference.
UKCA: UK Conformity Assessed. This is the UK's new mark for products placed on the market in Great Britain, indicating compliance with UK regulations.
WEEE: Waste Electrical and Electronic Equipment. This symbol indicates that the product should be disposed of separately from other waste at the end of its useful life. Proper disposal helps prevent potential negative impacts on the environment and human health.
