Title: Wearable and Heart Rate Monitoring (HRM) Devices

EU Data Act Information

Data Types	This product generates data such as: • Biometrics (e.g., heartrate) • Movement data (e.g., steps) • Location data (e.g., GPS coordinates) • Data relating to environment (e.g., barometric altimeter) • Device status information (e.g., battery percentage) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	FIT and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Cycling Computers and Tacx Trainers

EU Data Act Information

Data Type	This product generates data such as: • Movement data (e.g., compass) • Location data (e.g., GPS coordinates) • Data relating to environment (e.g., barometric pressure) • Device status information (e.g., battery percentage) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	FIT and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Power Meter Pedals

EU Data Act Information

Data Type	This product generates data such as: • Power data • Device status information (e.g., battery percentage) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	FIT and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Varia Cycling Accessories

EU Data Act Information

Data Type	This product generates data such as: • Data relating to environment (e.g., distance from radar targets) • Device status information (e.g., battery percentage) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	FIT and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Handheld Devices

(including inReach, Montana, and Alpha devices and systems)

EU Data Act Information

Data Type	This product generates data such as: • Location data (e.g., GPS coordinates) • Data relating to environment (e.g., barometric altimeter) • Device status information (e.g., battery percentage) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	GPX, FIT and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Automotive

EU Data Act Information

Data Type	This product generates data such as: • Location data (e.g., GPS coordinates) • Movement data (e.g., accelerometer) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	GPX and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Chronograph

EU Data Act Information

Data Type	This product generates data such as: • Ballistics data • Device status information (e.g., battery percentage) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	FIT and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Range Finders

EU Data Act Information

Data Type	This product generates data such as: • Distance to targets • Location data (e.g., GPS coordinates) • Device status information (e.g., battery percentage) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	FIT and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Golf Launch Monitors

EU Data Act Information

Data Type	This product generates data such as: • Golf metrics (e.g., carry distance, ball speed) • Device status information (e.g., battery percentage) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	FIT and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Marine Chartplotters, Fishfinders, and Transducers

EU Data Act Information

Data Type	This product generates data such as: • Location data (e.g., GPS coordinates) • Data relating to environment (e.g., sonar) For more information, please refer to the specifications provided on the product page.
Format	GPX and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Marine Radar

EU Data Act Information

Data Type	This product generates data such as: • Data relating to environment (e.g., distance to radar targets) For more information, please refer to the specifications provided on the product page.
Format	Garmin Proprietary
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	No
Retention Period	Data is not retained on device or connected displays beyond the real time image presentation.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Trolling Motors

EU Data Act Information

Data Type	This product generates data such as: • Location data (e.g., GPS coordinates) For more information, please refer to the specifications provided on the product page.
Format	GPX and JSON
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Both, but data is only uploaded to the server if synced.
Retention Period	Data is retained on device until deleted by user or until device runs out of storage space. Data uploaded to account is retained as long as account active or until deleted by user.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.

Title: Audio Stereos

EU Data Act Information

Data Type	This product generates data such as: • Device status information (e.g., battery percentage) For more details concerning the data generated by this device, please refer to the specifications provided on the product page.
Format	Garmin Proprietary
Estimated Volume	Volume of data depends on factors such as frequency of use and settings.
Is the product capable of generating data continuously and in real-time?	Yes, but whether data is actually generated continuously depends on the features used and settings.
Is the product capable of storing data on the device or on remote server?	Device only
Retention Period	Data is retained on the device only, for debug purposes. It is not user accessible.
Data Management and Related Terms	Visit our Account Management Center to manage your data. Please review the applicable Privacy Policy and Terms of Use.
