Nexus — EU Data Act Information

European Data Act · Article 3
Information obligation for connected products

Manufacturer: **Nexus Range** | Document issued by: **Passage du Désir** (passagedudesir.com)

Statement of non-applicability

Based on publicly available product information, **Nexus** devices sold by Passage du Désir do not include a companion smartphone application. Remote-controlled models (e.g. Ace, Bendz, Tornado, Revo range) are operated via a physical RF remote control only.

These products do not pair via Bluetooth, do not require account creation, do not transmit usage data to any server, and do not collect personal data of any kind.

As a result, the information obligation set out in Article 3 of Regulation (EU) 2023/2854 (European Data Act), which applies specifically to "connected products" generating data through an associated digital service, does not apply to these items.

Note

This assessment is based on publicly available information as of July 2026. If a specific Nexus model is found to include app/Bluetooth connectivity and data collection, this document should be revised accordingly. Passage du Désir has not been able to independently confirm the manufacturer's official position on this point and welcomes correction if new information becomes available.

Samenvatting (NL)

Op basis van openbaar beschikbare productinformatie beschikken Nexus-producten die door Passage du Désir worden verkocht niet over een bijbehorende smartphone-app. Op afstand bedienbare modellen werken uitsluitend via een fysieke RF-afstandsbediening, zonder Bluetooth-koppeling, zonder accountvereiste en zonder gegevensverzameling. De informatieverplichting van Artikel 3 van de Europese Data Act is daarom niet van toepassing op deze producten.

Document prepared by Passage du Désir (contact@passagedudesir.fr) · July 2026 · Based on publicly available Nexus product documentation · Pursuant to Regulation (EU) 2023/2854 (European Data Act), Art. 3. To be confirmed with the manufacturer if possible.
