ISHIVA

Power Bank is a portable charger that can be carried by individuals and can store electrical energy. It is mainly used to charge consumer electronic products such as handheld mobile devices (such as mobile phone and smart watch). It is especially used in situations where there is no external power supply. Its main components include: a battery used for energy storage, a circuit (DC-DC converter) that stabilizes the output voltage, and most mobile power supplies have a charger for charging the built-in battery.

Micro Input:5V=2A 9V=2A 12V=1.5A
Type-c Input:5V=3A 9V=2A 12V=1.5A
Type-c Output:5V=3A 9V=2A 12V=1.5A
USB Output:4.5V=5A 5V=3A 9V=2A 12V=1.5A
Material: ABS + Lithium polymer battery
