

# QUALITY POLICY

Annex A of the Quality Manual

Rev. 07  
Of: 10/01/2023

The company "EURO CAMPING srl." Has been specializing in the production and supply of cylinders and accessories for camping and leisure for over 40 years.

In the last decade, the company has also added to traditional production the construction of tanks for technical gases and air for the air conditioning and refrigeration, automotive and pneumatic industries.

Through its General Management, it signs the commitment to implement the Quality Policy according to the points listed below.

## - **Attention focused on the customer and interested parties**

The organization is committed to understanding customer needs and plans its activities to fully satisfy them. In the same way it operates in compliance with the requests and requirements:

- Of the reference market;
- The country in which it operates, complying with laws and regulations;
- Of all parties involved in their critical processes.

## - **Process approach**

The organization identifies the various activities of the organization as processes to be planned, monitored and constantly improved and the best resources for their implementation are made available. The organization manages its processes so that are unique:

- The objectives to be pursued and the expected results;
- The related responsibilities and the resources used.

Through internal audits, risk / opportunity analysis and during normal control activities through the involvement of staff, the Management ensures that all activities relevant to the design and manufacture of pressure equipment, cylinder stoves, gas stoves cartridge products and for In House Inspection activities take place through:

- The definition of the safety and quality requirements relating to the product in compliance with the customer's needs, the laws in force and the signed standards; in particular, the application of the PED 2014/68/EU Directive, the TPED 2010/35/EU Directive, the ADR / RID / ADN codes for In House Inspection activities and related standards for the European market, of the SASO ISO 22991 standard for the Saudi Arabia market and the CFR49 (Code of Federal Regulations) for DOT cylinder for the American market. For gas appliances, the application of Regulation (EU) 2016/426 GAR and the various related standards is guaranteed.
- The choice of suppliers in line with the company philosophy who actively collaborate in the pursuit of the best product quality.
- The control and recording of each stage of production as regards the TPED, PED, SASO, DOT cylinders, cylinder cookers and cartridge cookers.
- The qualification and continuous training of human resources, to ensure competence in the performance of their duties, safety at work, quality of results and respect for the environment.
- The provision of state-of-the-art equipment, technologies, work environments, suitable for achieving company objectives.

## - **Leadership**

The organization assumes responsibility for the effectiveness of its Quality Management System, making all the necessary resources available and making sure that the planned objectives are compatible with the context and the strategic guidelines of the organization.

The organization communicates the importance of the Quality Management System and actively involves all interested parties, coordinating and supporting them.

## - **Evaluation of risks and opportunities**

The organization plans its processes with a risk-based thinking approach in order to implement the most suitable actions for:

- Evaluate and deal with the risks associated with the processes;
- Exploit and reinforce the opportunities identified.

## - **Involvement of staff and interested parties**

The organization is aware that the involvement of staff and all interested parties, combined with active participation, are a primary strategic element.

It promotes the development of internal professional skills and the careful selection of external collaborations in order to equip themselves with competent and motivated human resources.

## - **Improvement**

The organization has a permanent goal to improve the performance of its Quality Management System.

The preliminary assessment of the risks and opportunities associated with business processes, the internal and external verification activities, and the management review are the tools that the organization puts in place to constantly improve.

The tool chosen by the Organization to constantly pursue its Policy is the Quality Management System compliant with the UNI EN ISO 9001: 2015 standard.
