SMART controls available

Besides its manual controls, this device also has Smart features such as app- and voice controls! You can therefore activate the air purifier from a distance using your smartphone or your voice assistant.

Scheduling and timer functions

Always be in full control of when you want to use the air purifier. Set a timer that can go up to 24 consecutive hours or use the scheduling function to strike a perfect, energy-efficient balance.

Built-in quality sensor with colour indication

The light on top of the air purifier is connected to the built-in quality sensor, which changes colour based on the air quality. You can also display the air quality on the Climate App in addition to the room temperature and humidity.

3-in-1 air filter (HEPA H13, carbon and pre-filter)

Using the 3-in-1 air filter, the Princess Air Purifier filters out any impurities you may find in your average household. From pet dander and dust to the smallest pollen, allergy symptoms will be reduced.
