

Foot Care Product Gel Heel Socks

The unique polymer gel heel cup forms an occlusive seal to lock in moisturizers. In just days, rough, dry, cracked heels will be smoother and softer to the touch.

The polymer gel cup is odorless, non-toxic, and hypo-allergenic. Wear gel socks at bedtime, and with shoes.

DIRECTIONS: Apply Cream or other moisturizers to your heel at bedtime. Slip heel sock over the toes and forefoot and position the gel cup around the heel. Expect significant reduction in dryness and/or cracking within a few days. Severe conditions may require longer use. Discontinue once skin has been restored, then use heel sock periodically as needed.

CONTENTS: Sock: 75% Cotton, 20% Polyester, 3% Rubber, 2% Spandex. GEL: 100% TPR

CARE: Wash by hand carefully, drip dry for 12 hours. Do not wring out. Do not bleach. To clean inner polymer cup, turn heel sock inside out, apply soap and water to wash cloth, rub gel cup gently and let dry.

WARNING: If you are a diabetic or have poor circulation, consult your physician or podiatrist before using this product.
