

Deb InstantFOAM[®] Complete

The Complete Solution for
Hand Sanitising

For use without water

**WORLD'S 1ST
VIRUCIDAL FOAM
HAND SANITISER**

Make Hands Matter in the Workplace

A World First Innovation

Deb InstantFOAM® Complete is the world's first alcohol-based foam hand sanitiser that is proven to be both fully virucidal and bactericidal, meeting all sanitising needs in one unique product solution.

Using patented Deb Foam Technology™ the unique perfume-free & dye-free alcohol-based liquid is dispensed as soft-structured foam and designed to be used without water to provide a complete solution for hand sanitising, combining safety and preference with highly effective broad spectrum biocidal efficacy.

**Dries in
20-30
seconds**

Deb InstantFOAM® Complete can be used at the immediate point of need to provide instant hand hygiene. When used as directed the product dries in 20-30 seconds to provide a high level of hand hygiene.

**Ideal for
use in
multiple
areas**

The product is ideal for use in all **healthcare, nursing and food handling** environments where hand hygiene is critical to reduce the risk of cross infection.

Also suitable for use in **cafeterias, offices, reception and lobby areas, rest rooms** and **any public facility** with germ transfer hotspots and where a higher level of hand hygiene is desired to help prevent the spread of germs.

Effective in the fight against the spread of common germs

EFFICACY

Deb InstantFOAM® Complete has been fully tested and proven to provide broad spectrum biocidal activity.

"Kills 99.999% of many common germs in 15 seconds"¹

The product has been very carefully formulated to enable its highly effective biocidal action to be achieved by optimising the level of alcohol with water, foam boosters and skin caring ingredients, without the need for any additional biocidal ingredients.

Bactericidal & Yeasticidal

Proven bactericidal activity in accordance with EN1500, EN12791, EN1276 and EN13727; yeasticidal in accordance with EN1650 and EN13624; and tuberculocidal in accordance with EN14348.

- | | |
|--------------------------|----------------------------|
| ✓ Staphylococcus aureus | ✓ Candida albicans |
| ✓ Escherichia coli | ✓ Aspergillus brasiliensis |
| ✓ Enterococcus hirae | ✓ Campylobacter jejuni |
| ✓ Pseudomonas aeruginosa | ✓ Listeria monocytogenes |
| ✓ M. terrae and M. avium | ✓ Salmonella |

Virucidal

Proven full virucidal activity in accordance with EN14476, therefore effective against all enveloped and non-enveloped viruses, e.g.:

- | | |
|--|--|
| ✓ Norovirus | ✓ Hepatitis A Virus |
| ✓ Human Rhinovirus | ✓ Herpes Simplex Virus Type 1 |
| ✓ Human Rotavirus | ✓ Adenovirus |
| ✓ Poliovirus | ✓ HIV Type 1 |
| ✓ Influenza A Viruses (eg. H1N1, H5N1, H3N2) | ✓ Filoviridae viruses (e.g. Ebola virus) |

PREFERENCE

The foam format of Deb InstantFOAM® Complete is preferred by users compared with alcohol-based liquids and gels.

Unlike with liquids, foam does not run off the hands and provides the user with complete control of the product without dripping or splashing, ensuring the full dose is applied effectively with every application. Compared with gels, foam does not contain gelling agents that leave the hands feeling sticky, particularly after multiple applications.

"Independent research has shown that 84% of users prefer foam to gel due to being non-sticky and fast drying"²

Deb InstantFOAM® Complete incorporates moisturisers to leave the skin feeling soft and refreshed after use. **Clinically proven to prevent skin dryness, even during high frequency usage.**

SAFETY

Deb InstantFOAM® Complete has been carefully formulated with safety in mind.

Hypoallergenic

Carefully formulated to minimise the likelihood of any adverse allergic reactions occurring during use.

Non-Irritating to Skin

Validated by a dermatologist to show the product has good skin compatibility and is non-irritating.

Does not create antimicrobial resistance

The highly effective non-specific, multi-target biocidal action of the product ensures there is no risk of antimicrobial resistance.

Non-tainting to food

Independently tested and proven not to have the potential to taint food, making it safe for use in any food handling environment.

Compatible with gloves

Independently tested to prove the product can be applied to hands prior to wearing latex, vinyl and nitrile gloves without effecting material integrity.

¹Test Report BSL150826-201: An evaluation of the antimicrobial properties when challenged with 58 micro-organism species using in-vitro time kill ASTM E2783-11 method.

²Independent research Commissioned by Deb

Further details on the tests and studies referenced are included in the "Deb InstantFOAM Complete Product Tests" brochure - available on request.
