[EN] PRODUCT INFORMATION AND INSTRUCTIONS

Carefully follow the enclosed step-by-step instructions to assemble the Dog Pet Cage. Take an organized approach, laying out all of the components in an orderly fashion and keeping them all together to ensure that nothing is broken or you hurt yourself by standing on them.

Please keep this instruction manual for future reference. It contains important information.

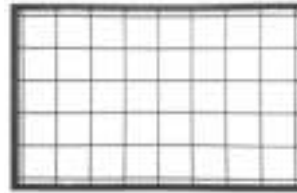

COMPONENTS

(A)

(B)

(C)

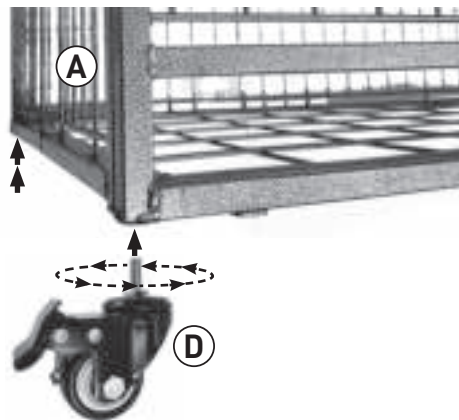

(D)

ASSEMBLY INSTRUCTIONS

1. Lay the folded cage frame (A) on its side to attach the 4 wheels (D).

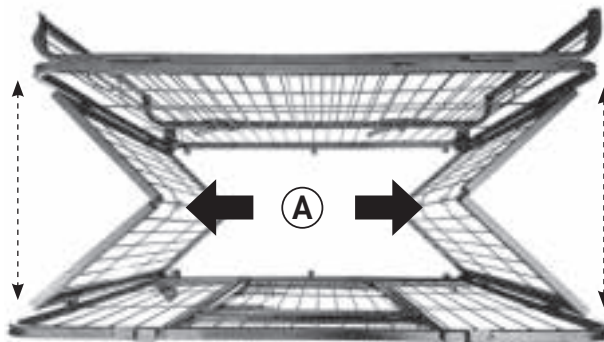

2. Place the cage frame (A) right way up on the floor and open it out.

3. Push the folding parts together on both sides of the cage.

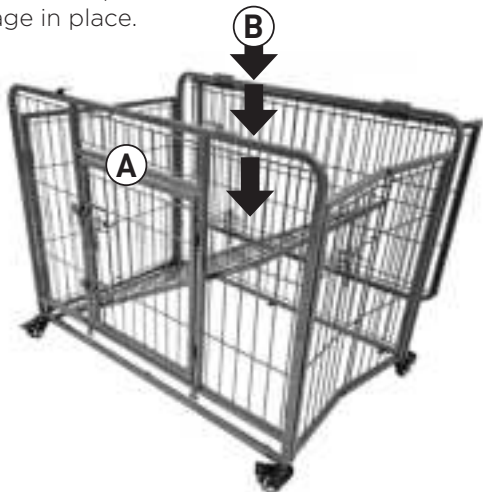

IMPORTANT: be careful not to pinch your hand or jam your fingers.

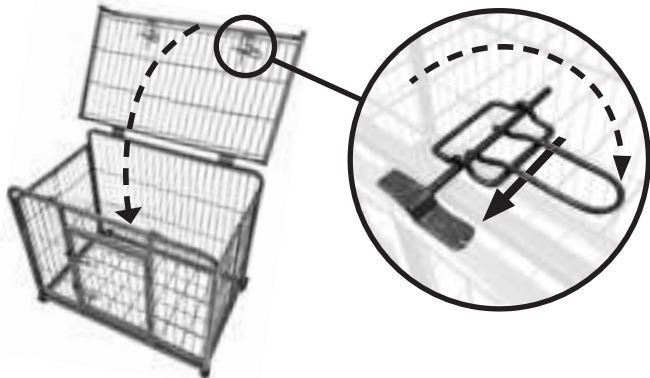

NOTE: the wheels have stops on them. Push down on them gently with your foot to lock them.

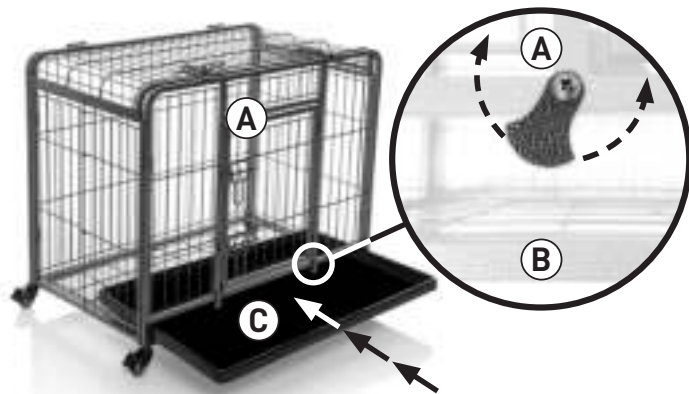

4. Place the cage floor (B) in from the top and push it down into place. This will also secure the sides of the cage in place.

5. Secure the top of the cage by pushing the 2 locks through and turning the latches to the right.

6. Slide the base tray (C) in on top of the cage floor (B) by lifting the 2 small hanging barriers.

7. To open the gate on the side, the 2 latches need to be pulled up and then pulled to the right.
