

The technical drawing consists of two views of a water heater. The left view is a front elevation showing the unit's width (W) and height (H). It features a control panel at the bottom with a pressure gauge, a red emergency stop button, and a green power button. A blue drain plug is labeled '1', the main water inlet/outlet is labeled '2', and the bottom support bracket is labeled '3'. The right view is a side cross-section showing the internal tank (D), the heating element (G), and the thermostat assembly (4). The tank is filled with blue liquid representing water.
