

LED Panel RGBWW Light Godox C5R

The C5R RGB Pocket LED Panel can add extra color and a pinch of creativity to your photos or videos. Integrated into the light is a 3000mAh rechargeable lithium-ion battery that can run for two hours, and is charged using the included USB Type-C cable. A thread on the bottom of the panel allows it to attach it to an articulating arm or the included cold shoe mounting base. The back is magnetic for even more mounting flexibility.
