Suck Water Directly

1. Put straw into water (4-8cm)
2. Blow air into the straw (exhaust air inside)
3. Suck water lightly (suck water a few mouthfuls of water to avoid the bubble).
4. Blow straw after drinking, to keep it clean and prevent them from clogging.

Connect Bottles

Connect bottle instead. The 28mm international standard bottles needed (Eg: coca cola) Drink or squeeze the water into a cup.

Connect Water Bags

1. Fill the bag with water. Full pour outlet tube by water from water bag in order to eliminate air in it.
2. Connect the straw. Hang up the water bag. Filter water will flow from filter tip.
