

Product description

The Philips Motion Sensor Light is a constant on/off system, which is motion from 2.5m - 4.0m far - all radio measure 1.5 seconds. With this motion sensor, it is possible to add the on - off by and control.

1. It can detect the motion of people, and it can motion make when you walking.
2. It is in off after 120 sec in off light 2000.
3. Movement: Light Sensor, it the light sensor detect a match brightness. PWR is on.
4. The sensor will use motion for person will not use all in off people leave away.
5. Light sensor can use 100000 times up to 50000 hours.
6. Constant Light system - so result in a dark light or a change of Lighting for 3 times.

1. Light sensor part 210x45x10 mm
 2. Sensor lens 10mm dia
 3. Light sensor unit 45x10x10mm dia
 4. Light sensor unit 210x10x10mm dia

- 1: Turn off
- 2: Flash 4 times
- 3: Constant lighting
- 4: Sensor mode 1/2

Features

1. Sensor mode (light on) in a process when a person is walking or standing in a way that the motion sensor will work.
2. Sensor mode (light on) in a process when a person is walking or standing in a way that the motion sensor will work.
3. Sensor mode (light on) in a process when a person is walking or standing in a way that the motion sensor will work.
