

Installation steps

1: Open the box and take out the parts.

2: Get every part unspooled and laid out to assemble.

3: Assemble the short tubes to petals. The short end of the tube goes into the petal.

4: Assemble the long tubes to the rear petal. Short end of the tubes will go toward into the petal as well.

5: Assemble the petals with long tubes to the plate.

6: Fix the petals to the plate with nuts.

7: Assemble the all the 3 petals with short tubes to the plate as shown.

8: Assemble the petal with short tubes to the corner of the plate.

9: Fix the petal with nuts.

10: Use screws to tight up the nut function.

11: Connect all the wires to the collector plate as shown.

12: Fix the screws with flat heads to the cross, use the small nuts to settle the position of each screw.

13: Put down the cross, feed out the four small tubes on the plate, make sure all the screws installed on the cross can go through the holes on the plate.

14: Install the cross with the sharp-point screws to the ceiling, do not miss the four flat-headed screws.

15: Lift up the light and insert it to the cross, the four flat-headed screws go through the plate and then use the nuts to tighten the light.
