## ABOUT SAFESHAVE™

### About our shaving head

Your ManMower is delivered with 1 SafeShave™ shaving head. We recommend replacing it every 3 months to keep maximum performance & hygiene. Check [www.balzy.eu](http://www.balzy.eu) for replacements

Our designer wanted to show you what your SafeShave™ blade looks like. Well, this is how...

To replace your SafeShave™ blade, simply push it into the trimmer head. There is a matching space available.

Once in position, simply push your blades in until you feel it 'click-in'

Removing your your SafeShave™ blade is just as easy. Push the top and make sure it clicks out.

## CLEANING

### What's important for man and machine

- Rinse your SafeShave™ with water after every use.
- Feel free to use the brush inside your box to clean the blades more thoroughly.

**DON'T** use your ManMower 3.0 for your facial hair. We've warned you a few times. Check our website for more insights on this risk.

### How to clean the device

## SOME TIPS FROM THE PROS

### Make the most of your ManMower experience

- The ManMower is a powerful tool. Use it as such, you're basically maintaining some of your most delicate body parts.
- Warm up the skin before you start. It will soften and smoothen the skin, making trimming a lot easier.
- Take the time when you trim 'down below'.
- Use the safety guards if you're unsure about your trimming skill.
- Use the 'floating technique' to trim your pubes. It's safe & convenient.
- Clean up after you've trimmed. Or someone will hurt you (or divorce)
