

COCONUT OIL

Product Information

Introduction

We all know that coconut oil is good for our skin and hair. However, due to the wide selection of brands, we never know which type of coconut oil is effective. The enormous difference in the cosmetic and nutritional benefits of coconut oil lies in its processing and, indeed, its method. The Volcanic Earth Europe products for hair and skin use ONLY coconut oil, which is made using the DME method. This means that the oils are extracted by cold pressing the fresh coconut meat within 3 hours after the shell is broken. This "wet grinding" is called DME ("Direct Micro Expelling") method and gives us pure coconut oil. The DME process is recognized as the highest production method, producing the purest, finest and refined coconut oil that is free of impurities, non-hydrogenated and contains all the good ingredients and antioxidants that are an innate component of the fruit.

Features

Traditional effective with:

- acne
- wrinkles
- neurodermitis

Storage, Handling, Other Information

This product is not intended to diagnose, treat, cure or prevent any diseases.
Our products are 100% natural and it can occur that the color or smell varies per batch. There will be no difference in the effectiveness of the ingredients.

Few Tips for using Pure VolcanicEarth Coconut Oil:

- Volcanic Earth coconut oil should be used for dry skin at least 3 times a day for 4-5 days.
 - After a few more days, repeat the process if necessary.
 - A few drops of VolcanicEarth coconut oil is sufficient to apply directly on the skin, just enough to absorb in easily.
 - Volcanic Earth coconut oil smells delicious, after a few seconds the smell disappears.
 - Coconut oil has a melting point of about 24-26 degrees and is therefore mostly solidified in our climate.
 - Once the coconut oil touches your skin it will melt.
 - Volcanic Earth coconut oil can be used as a massage oil
 - Volcanic Earth coconut oil can be combined with Tamanu oil for common skin problems.
 - Avoid eye contact
 - Shake well before use
 - Not eatable
-
- **Coconut oil can become more massive at temperatures below ± 24 degrees Celsius.**
 - **Tip: Keep the bottle under tepid water for a time**
 - If less oil comes out of the bottle, optional: remove the dropper manually
 - Protect bottle from direct sunlight
 - Extreme heat > 52 degrees Celsius will lessen the shelf life
 - Shelf life: 2 years from date of delivery to customer assuming unopened and stored correctly
 - After opening, 12 months shelf life
 - Always test a small piece of skin and wait at least 24 hours
 - If you experience extreme itching, redness, irritation or other adverse effects, discontinue use of the product immediately.
