	The Netherlands

RoHS FC CE

- For memory kits with XMP/EXPO, enable XMP/EXPO/DOCP/A-XMP profile in BIOS to reach the rated potential XMP/EXPO overclock speed of the memory kit, subject to the use of compatible hardware.
- Reaching the rated XMP/EXPO overclock speed and system stability will depend on the compatibility and capability of the motherboard and CPU used.
- Usage in any manner inconsistent with manufacturer specifications, warnings, designs, or recommendations will result lower speeds, system instability, or damage to the system or its components.
- Computer components may have sharp edges. Caution is required and protective wear is recommended when handling computer components.
- For extended product information or manufacturer recommendations, visit the G.SKILL website at www.gskill.com.
- For product support and related questions, please contact G.SKILL tech support via email (techsupport@gskill.com).

...will boot at the SPD speed at default BIOS settings with compatible
