PRINCESS®

## Modernise your kitchen appliances

Bring modern design into your kitchen with this black, die-cast aluminium kitchen machine. The strong, but very sleek base of the appliance supports a stainless steel bowl and the motor part which can be angled upwards with the press of a button.

## Built to last kitchen machine

A powerful, 1200-watt motor supported by a durable metal gear system ensures that any recipe can be tackled using this appliance. Thanks to these features, 5 different speed settings and a pulse function can be used reliably and without any effort.

## Suitable for big-batch recipes

Using the 5-litre bowl made of stainless steel, you can comfortably prepare big batches for the entire family. In addition, the splash guard prevents excess batter from leaving the bowl and it has a refill opening to safely add ingredients.

## Durable accessories up to the task

Never worry about the batter being too thick! The teflon-coated beater and dough hooks can work their way through any batter while the stainless steel whisk is made to withstand the highest speed settings.
