

ADVICE

Fasten always properly your helmet. The chin strap should fit correctly and should not become loose when pulled. Unadapted or wrongly fastened helmet can be dangerous because it could be displaced in the event of an accident and cause severe head injury. Never modify your helmet in any way. Modifications could involve lowering the effectiveness of your helmet. When your helmet sustains a severe shock, get it back to the manufacturer for control or destruction. Not being sure, replace it.

CARE AND MAINTENANCE

Clean the outside and inside of your helmet regularly. For the outside, use a soft and warm or slightly soapy water. The padding is removable to make it easy to clean. Use also a soft and warm or slightly soapy water. Hand wash and drip dry. Never use gas oil, solvent, petrol or other aggressive products. For the inside, never use washing machine or drying machine.
