

VENUM

Protective cup COMPETITOR

User's guide

Be sure to read the safety precautions below before using the protective cup. Keep this manual handy for future use.

This protective cup for men is designed for the practice of martial arts.

WARNING !

This protection is designed to limit the risk of injury under normal conditions of use. It does not guarantee a complete lack of injury. Do not use this protective cup other than for its original purpose. Do not make any alternations.

Check the condition of this protection before each use. Any damage will diminish the level of protection.

Sizes

The Venum protective shell is available in one size. The jockstrap is adjustable for a secure fit. We offer 3 choices depending on your waistline:

M : 81-86 cm - **L** : 86-91 cm - **XL** : 91-99 cm

Adjusting and fitting

The strap should be adjusted to allow a 10 to 15% margin for movement during usage.

Area of protection

The plastic shell is the only part of the product to provide protection to the user.

The jockstrap alone does not offer protection.

Only the combined use of the shell and the jockstrap offers a good level of protection to the user.

Washing

Machine wash the jockstrap at 30 °c. Line dry at room temperature.

Verification of use

Check before each use, as the performance of this item is affected during use. If sufficient protection is no longer provided, it is recommended to replace the product as soon as possible. Avoid any variations of environment such as the temperature, which significantly reduces the performance of the product. Contamination, alteration or misuse of the protective shell cause dangerous degradation in performance.

We recommend to change your protective every 5 years
