SULSENA SHAMPOO ANTI-DANDRUFF

**THE FIRST STEP IN SOLVING
THE PROBLEMS OF DANDRUFF
AND ITS CONSEQUENCES**

Shampoo action:

Formula of SULSENA anti-dandruff shampoo is created on the basis of an active seboreregulating component **selenium disulfide (SeS₂)**, which possesses an uncanny ability to impact directly on the major reason for dandruff formation - on yeast fungus **Pityrosporum Ovale**.

The shampoo effectively inhibits the reproduction of the fungus, destroys favorable environment for its development, normalizes the function of sebaceous glands and scaling of the dead epidermal cells of the scalp.

SULSENA shampoo is the first step in solving the dandruff problem and its consequences, a deep cleansing of hair showing signs of enhanced sebaceous glands secretion and oily dandruff.

Acid-base balance (pH) of the shampoo conforms to physiological acid-base balance (pH) of scalp.

The result: promotes recovery of scalp protective function, takes an anti-dandruff action, has a sebo-regulating effect, reduces itching.

The effectiveness is confirmed by the State Enterprise Research and Development Institute at Ministry of Labour of the Russian Academy of Medical Sciences. Findings of March 05, 2008.

Directions: apply to wet hair and lather. Gently massage the scalp at hair roots, leave the shampoo on the hair for 3 minutes and then rinse thoroughly with warm running water. Repeat the procedure.

Recommendations for use: suitable for frequent use.

Precautions: contains selenium disulfide. Avoid contact with eyes and damaged skin. In case of contact, rinse thoroughly with plenty of warm running water. Keep out of the reach of children.

Contraindications: not established.

Do not use the shampoo if you have individual intolerance or hypersensitivity to any of the ingredients.

Storage conditions: store at the temperature from +6°C to +25°C, humidity not more than 70%, away sources of heat. Avoid ingress of direct sunrays.
