When Caps Lock and/or the windows key are active they will be lit white. When they are off, they will be the same color as the rest of the keys.

LED combinations

FN + * = Change backlight mode
FN + Å = Decrease backlight brightness
FN + ¨ = Increase backlight brightness
FN + . = Change backlight color setting
FN + Ä = Increase backlight speed
FN + Ö = Decrease backlight speed

LED modes

The keyboard has 19 LED modes in total (Not counting software modes).
Most of the LED modes color can be changed with (FN + .).
You can also change the speed or the light intensity of the LED mode.
When a speed or intensity has reached a minimum or maximum level, the keyboard will respond by flashing the LEDS of the Caps Lock and windows key.

Software

RGB with 16 million colors is only available via the software. The software is optional. Download the software from Deltaco.se on the product page and proceed with the installation.
https://www.deltaco.se/sites/cdn/
DriversLibrary/GAM-075/GAM-075.zip
Compatibility: The software is compatible with Windows 10.
With the software you get 3 profiles. In each profile you can have a custom mode(User defined).
Some of the software's LED modes also has settings like: Intensity, speed and direction.

Profiles

The software has user profiles. Each user profile can save your macros and LED settings.

Hardware compatibility

The keyboard is compatible with Windows from 7/8/10 and MacOS from 10.0.
Please note that the software has a separate compatibility.
