BATTERY INSTALLATION

APPLY LABELS

- Unscrew the battery cover with a Phillips head screwdriver (not included).
- Install 4 new D (LR20) alkaline batteries (not included) in the battery box.
- Replace the battery cover and tighten screws.
- Replace batteries if the booster can no longer propel vehicles through the track set.
- Dispose of batteries safely.
- For longer life, use alkaline batteries.
- When exposed to an electrostatic source, the product may malfunction. To resume normal operation, remove and reinstall the batteries.

Additional tracks and sets sold separately, subject to availability. Colors and decorations may vary.

Refer to each expansion track set instructions for assembly details and play features.

Use extra track connectors as needed to build your favorite layout!

PARK ADDITIONAL MARIO KART™ VEHICLES IN THE SPECTATOR ZONES TO CHEER ON THE RACERS!

Q. Why isn't my kart speeding up after passing through the booster?

A. The booster battery level is too low and the booster can no longer propel your kart through the track set. Switch off the booster and install new batteries.

Q. Why does my kart keep crashing off the track?

A. Make sure track is on a flat, hard surface. Check to make sure all track pieces are properly assembled. Clear all obstructions on the track and adjust track side walls at each connection point to ensure each piece is firmly attached.

Q. Why is my kart having trouble getting past the tower?

A. The inner long curve track may be obstructed when it is attached incorrectly to the tower. Adjust the curve track to ensure it is attached to the tower in the correct position.

Not for use with some Hot Wheels® vehicles. Two vehicles included. Additional vehicles sold separately.
