

STREX WIRELESS CHARGER

The Strex wireless charger pad has a Type C input and built-in multiprotection. With a soft LED light indicator, the wireless phone charger will never interrupt your sleep but still keep you updated about the charging process.

CASE FRIENDLY

The wireless charger works through most phone cases up to eight mm thick. Removing your phone case is unnecessary; keep it on and just place and charge.

STYLISH SLIM SURFACE

The wireless charger is designed with a full, slim, stylish surface, which helps the heat radiate fast. The square base efficiently keeps your phone securely in place and prevents the charger from slipping off.

15W MAX FAST WIRELESS CHARGER

There are three charging modes: 15W fast max charging, 7.5W fast charging and 5W standard charging. This wireless charger is suitable for all Qi-enabled devices.

MULTIPROTECTION

The charging pad has a smart chip on board, which prevents overheating, over-voltage loading, under-voltage loading, and short-circuiting, ensuring maximum safety for your device.
