How to replace the switches on the keyboard

Hot-swappable keyboard: You can replace different switches, whether it is a linear or tactile switch, support 99% 3-pin mechanical switches, and customize your own keyboard.

If the user replaces the switch by themselves or damages the keyboard during the replacement process, the product warranty will be voided.

① Pull out the switch with a switch puller

② Pull out the switch with a switch puller

③ Confirm the positions of pins and holes

④ Press the switch vertically to the PCB board
