5.3 USB WIRELESS Audio adapter 2 IN 1 Wireless Audio Receiver

Product introduction:

This product is a USB/3.5mm dual output Bluetooth receiver, which is suitable for speaker/power amplifier/car/headset and other devices. USB can support audio output and most car USB on the market. Bluetooth connection products of mobile phones/tablets and other devices can play music and support the call function.

Operation steps:

Connect the USB receiver to the USB interface of the player or the USB powered 3.5mm audio cable, and there will be a prompt tone. Open the mobile phone Bluetooth search "YET-M1", click the connection, and the light will stay on after the connection is successful, playing music and other voice files.
