ATTENTION

Please read the instruction carefully before installation and use.

1. The cutting surface of steel tube is very sharp, please do not touch it.
2. Please confirm whether all parts are complete.
3. Please be sure to follow the instructions of the installation sequence assembly.

1. Take out the down branch tube, screw and gasket, align with the size of the mesh respectively and fix them with screws. (like as the picture)

2. Take out the hang lever, up branch screw and gasket, and fix them with screws. (like as the picture)

3. Combine the up and down part together and make sure it is fixed.

4. Check whether the screw is locked, and then assemble it done. (as shown in the figure below)
