# FOREST SHUFFLE

Easy-to-learn Rules

Beautiful illustrations

Multifunctional cards

Life is bustling in the local forest: Animals scurry around the clearings looking for edible plants and insects. Some prefer the dense treetops, others the lush undergrowth and only feel comfortable in the shelter of the trees.

Create an ecologically balanced habitat for flora and fauna.

Plant trees in your forest and add different animals, plants and mushrooms.

Some of them prefer certain habitats ...

... or food sources ...

... and others require the presence of their fellow species.
