Noise values and vibration values (triax vector sum). Grass Trimmer mode according to EN50636-2-91:		
L_{PA} (emission sound pressure level)	dB(A)	81.0
L_{WA} (sound power level)	dB(A)	94
K (uncertainty for the given sound level)	dB(A)	1.8
Vibration emission value a_{h1} =	m/s^2	3.1
Uncertainty K =	m/s^2	1.5

The vibration emission level given in this information sheet has been measured in accordance with a standardised test given in EN50636 and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure.

⚠ WARNING: *The declared vibration emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or poorly maintained, the vibration emission may differ. This may significantly increase the exposure level over the total working period.*

An estimation of the level of exposure to vibration should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration such as: maintain the tool and the accessories, keep the hands warm, organisation of work patterns.

Battery Cat #	Output Voltage	Charger SFMCB12
SFMCB202	18	X
SFMCB204	18	X
SFMCB206	18	X

"X" Indicates that the battery pack is compatible with that specific charger. Read the instruction manual for more specific information.
