

Operation manual of multifunctional cleaning machine

Cleaning and maintenance:

1. When cleaning and maintaining, please remove the battery and cut off the power.
2. Pour the soap into the cleaning tank to cover the cleaning liquid. Clean with soft sponge. When the tank is dirty, add 1-2 drops of neutral detergent and rinse with clean water after cleaning.
3. Wipe the surface of the machine with a soft cloth, and then dry it with a dry cloth.
4. Pay attention not to introduce water into the motor and battery compartment during cleaning.

Common faults and Troubleshooting:

According to our investigation and statistics, 80% of the machines can't be started up due to the following reasons:

1. Check whether the battery is completely inserted or not.
2. Try to take out of batteries to see if the original batteries are dead.
3. Open the battery cover and remove the battery to see if there is water in the battery compartment. If there is water, use the mop or brush to clean the battery compartment. After the water is dried, use the original battery.
