DECENT ONE MAX

20 mile max-range

36v 360Wh Battery

5-6 Hour charge time

Weighs 15kg

DECENT BATTERY

Want to **extend your range**? Can't get your scooter near a plug? Unlike the majority of competitors, you can **remove the battery** from a Decent One scooter **in seconds, with no tools**.

Charged in under 3 hours (6 hours for the larger One Max), these modular batteries allow you to have a spare charging (externally from the scooter, using the standard charger) and always ready to go. With a drop-in fitting and **upgraded capacities available**, your range is only limited to how many you can carry.

DECENT COMFORT

Want a **smoother**, more **stable** ride? When it comes to tyre size, Decent believe that **bigger is better**. The One and One Max are fitted with huge **10-inch diameter** pneumatic tyres that **soak up bumps** and **take the fatigue out** of longer rides.

Run at recommended pressures these tyres are puncture resistant and can be filled with sealant for peace-of-mind. Fitted with easily accessible 'car' type Schrader valves, they can easily be inflated **without fiddly extra adaptors**.

Should a puncture occur, the tyres and inner-tubes are **readily available** and much simpler to fit than those found on competitors scooters.

DECENT PERFORMANCE

In sport mode, the **350w** front-mounted hub motor propels the scooter up to its top speed of **18.6mph** in seconds. Load-dependant, it can cope with inclines as steep as **20%**.

Three user selectable drive modes feature speed limits of 6mph, 9mph and 18.6mph can be combined with the scooters simple 'press and hold' **cruise-control** function, to aide you in relaxed cruising, or **maximising the range** from each battery.

Further speed limits of 12.4mph and 15.5mph can be set within the menu system, as can enabling a **standing-start** feature, negating the kick-push required on many competitor models.

DECENT FEATURES

Decent deliver a **quality experience** for an **affordable price**. The scooters include front and rear mudguards, mechanical brakes, lights, a bell, soft footplate and hand grips, sticky tyres, a thumb throttle and a bright LED display showing speed, mode and battery capacity.

The **IP54** rating makes them suitable for year-round use. At **only 13kg**, the Decent One is lighter than many competitor scooters. It can be **folded down in seconds**, carried in one hand and is compact enough to be stowed under a train seat, or in the boot of a small car.

DECENT ONE SPECIFICATION

DECENT ONE

- 10 mile max range
- 18.6 mph max speed
- 36v 180Wh Battery
- 2-3 Hour charge time
- Weighs 13kg

DECENT ONE MAX

- 20 mile max range
- 18.6 mph max speed
- 36v 360Wh Battery
- 5-6 Hour charge time
- Weighs 15kg

FEATURES

- 350w front-hub motor
- User-removable battery
- 3 Speed/drive modes
- Bright LED display
- 42V 2A mains charger

SAFETY

- Front hub motor brake
- Mechanical rear disc
- Emergency guard brake
- LED head/brake-lighting
- Rubber grips and deck

COMFORT

- 10-inch pneumatic tyres
- Cruise control feature
- Wide 15cm footplate
- Compact handlebars
- Safe folding mechanism

SPECIFICATION

- 108x42x118cm unfolded
- 108x42x460cm folded
- 11cm ground clearance
- 100kg max-payload
- IP54 Rated

DECENT ACCESSORIES
