

# THE KEYWING

*An award-winning key turner designed for those with arthritis or weak hands*

This award winning design offers a simple solution to the problem of using Yale Keys which have a small surface area making them difficult to grip and turn. The Keywing clips over the key to provide a much wider finger contact area which improves grip and leverage when turning. Available in a range of 4 colours allowing the user to colour-code their keys and find the right one first time, every time.

**HOW TO USE:**

The key simply slots through the colours KeyWing which has anti-slip gel pads to maintain key position. The Keywing uses steel hinges to fold back on itself then clips together ready to use.

FEATURE	BENEFIT
Increases size of key	Easier to grip and provides leverage for turning
Bright colours available	Easy to find
Tactile bumps	Stop fingers slipping
Made from Nylon	Warm to touch even in extreme cold

**RECOMMENDED FOR:**

Weak Grip	Poor Hand Control	Visual Impairment	Tremor
