

HDMI ULTIMATE 4K

TRUE TRANSMISSION TECHNOLOGY * HYBRID DESIGN * HALOGEEN FREE

The HDMI Ultimate 4K is the proud result of the design challenge to build the ultimate HDMI™ interface cable which leaves all others behind.

Flawlessly transferring the HDMI™ High Speed (2.0b) standard's gigantic amount of digital data of gigabits per second over distances in excess of 15 meters is at the near limits of conventional cable technology. Achieving such without the help of signal repeaters requires deployment of the best materials and maximum manufacturing precision, or else the extremely high frequency signals transferred merely end in a blur.

4K ULTRA HD

FEATURES

Is available in lengths from 1 meter up till 15 meters.

The resulting exceptionally wide bandwidth, minimized signal losses and ultra-low jitter ensure a clearly detailed and very stable picture as well as impeccable sound.

Supports display modes/resolutions up to and including 4K; warranted for lengths up to 15 meter.

Makes use of extra thick high-density silver plated oxygen free copper conductors and low dissipation dielectrics.
