THIS PRODUCT IS DESIGNED FOR WINE STORAGE ONLY.

1. WINE COOLER SAFETY

YOUR SAFETY AND THE SAFETY OF OTHERS ARE VERY IMPORTANT.

We have provided many important safety messages in this manual for your appliance. Always read and obey all safety messages.

This is the Safety Alert Symbol. This symbol alerts you to potential hazards that can kill or injure you and others. All safety messages will follow the Safety Alert Symbol and either the words „**DANGER**”, „**WARNING**” or „**CAUTION**”.

DANGER means that failure to heed this safety statement may result in severe personal injury or death.

WARNING means that failure to heed this safety statement may result in extensive product damage, serious personal injury, or death.

CAUTION means that failure to heed this safety statement may result in minor or moderate personal injury, property or equipment damage.

All safety messages will alert you to know what the potential hazard is, tell you how to reduce the chance of injury, and let you know what can happen if the instructions are not followed.

2. IMPORTANT SAFEGUIDES

Before the Wine Cooler is used, it must be properly positioned and installed as described in this manual, so read the manual carefully. To reduce the risk of fire, electrical shock or injury when using the Wine Cooler, follow basic precautions, including the following:

- Plug into a grounded 3-prong outlet, do not remove grounding prong, do not use an adapter, and do not use an extension cord.
- It is recommended that a separate circuit, serving only your Wine Cooler be provided. Use receptacles that cannot be turned off by a switch or pull chain.
- Never clean Wine Cooler parts with flammable fluids. These fumes can create a fire hazard or explosion. And do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.
- Before proceeding with cleaning and maintenance operations, make sure the power line of the unit is disconnected.
- Do not connect or disconnect the electric plug when your hands are wet.
- Unplug the Wine Cooler or disconnect power before cleaning or servicing. Failure to do so can result in electrical shock or death.
- Do not attempt to repair or replace any part of your Wine Cooler unless it is specifically recommended in this manual. All other servicing should be referred to a qualified technician.

FOLLOW WARNING CALL OUTS BELOW ONLY WHEN APPLICABLE TO YOUR MODEL

- Use two or more people to move and install Wine Cooler. Failure to do so can result in back or other injury.
- To ensure proper ventilation for your Wine Cooler, the front of the unit must be completely unobstructed. Choose a well-ventilated area with temperatures above 60°F (16°C) and below 90°F (32°C). This unit must be installed in an area protected from the elements, such as wind, rain, water spray or drips.
- The Wine Cooler should not be located next to ovens, grills or other sources of high heat.
- The Wine Cooler must be installed with all electrical, water and drain connections in accordance with state and local codes. A standard electrical supply (220-240V AC only, 50 Hz), properly grounded in accordance with the National Electrical Code and local codes and ordinances is required.

- Do not kink or pinch the power supply cord of Wine Cooler.
- The fuse (or circuit breaker) size should be 15 amperes.
- It is important for the Wine Cooler to be leveled in order to work properly. You may need to make several adjustments to level it.
- All installation must be in accordance with local plumbing code requirements.
- Make certain that the pipes are not pinched or kinked or damaged during installation.
- Check for leaks after connection.
- Never allow children to operate, play with or crawl inside the Wine Cooler.
- Although the unit has been tested at the factory, due to long-term transit and storage, the first batch of cubes must be discarded.
- Do not use solvent-based cleaning agents or abrasives on the interior. These cleaners may damage or discolor the interior.
- Do not use this apparatus for other than its intended purpose.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Do not use the appliance if the plug, the mains cord or the appliance itself is damaged. If the mains cord is damaged, you must have it replaced by the manufacturer, or an authorized service centre or similarly qualified persons in order to avoid a hazard.
- Children should be supervised to ensure that they do not play with the appliance. Keep the mains cord out of the reach of children. Do not let the mains cord hang over the edge of the table or worktop on which the appliance stands.

4. IMPORTANT SAFETY INSTRUCTIONS

WARNING

To reduce the risk of fire, electrical shock, or injury when using your appliance, follow these basic precautions:

- Read all instructions before using the Wine Cooler.
- **DANGER or WARNING:** Risk of child entrapment.
Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous . . . even if they will “just sit in the garage a few days”.
- **Before you throw away your old Wine Cooler:** Take off the door. Leave the shelves in place so that children may not easily climb inside.
- Never allow children to operate, play with, or crawl inside the appliance.
- Never clean appliance parts with flammable fluids. The fumes can create a fire hazard or explosion.
- Do not store or use gasoline or any other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.
- Do not repair or replace any part of the Wine Cooler or attempt any servicing unless specifically recommended in the user-maintenance instructions or in published user-repair instructions. Replace the fuse with the same type.

- Save these instructions -

5. INSTALLATION INSTRUCTIONS

5.1. Before Using Your Wine Cooler

- Remove the exterior and interior packing.
- Check to be sure you have all of the following parts:
 - Wooden or chrome shelves
 - Instruction Manual
- Clean the interior surface with lukewarm water using a soft cloth.

5.2. Installation of Your Wine Cooler

- This Wine Cooler is designed to be free standing installation or built under counter.
- Place your Wine Cooler on a surface that is strong enough to support it when it is fully loaded.
- Allow 1-5 cm of space between the back and sides of the Wine Cooler, which allows the proper air circulation to cool the heat sink.
- Locate the Wine Cooler away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Extreme cold ambient temperatures may also cause the unit not to perform properly.
- Avoid locating the unit in moist areas.
- Plug the Wine Cooler into an exclusive, properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. Any questions concerning power and/or grounding should be directed toward a certified electrician or an authorized service center.
- After plugging the Wine Cooler into a wall outlet, allow the unit to cool down for 2-3 hours before placing any items in the compartment.
- Rest the wine cooler for 24 hours after transportation.

5.3. Electrical Connection

Improper use of the grounded plug can result in the risk of electrical shock. If the power cord is damaged, have it replaced by an authorized service center.

- This appliance should be properly grounded for your safety. The power cord of this appliance is equipped with a three-prong plug which mates with standard three prong wall outlets to minimize the possibility of electrical shock.
- Do not under any circumstances cut or remove the third ground prong from the power cord supplied. For personal safety, this appliance must be properly grounded.
- This appliance requires a standard 220-240 Volt AC / 50Hz electrical ground outlet with three-prong. Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded. When a standard 2-prong wall outlet is encountered, it is your responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.
- The cord should be secured behind the appliance and not left exposed or dangling to prevent accidental injury.
- The appliance should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating label on the appliance. This provides the best performance and also prevent overloading house wiring circuits that could cause a fire hazard from overheated. Never unplug the appliance by pulling the power cord. Always grip the plug firmly and pull straight out from the receptacle. Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end. When moving the appliance, be careful not to damage the power cord.

5.4. Extension Cord

Because of potential safety hazards under certain conditions, it is strongly recommended that you do not use an extension cord with this appliance. However, if you must use an extension cord it is absolutely necessary that it be a 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 220-240 volts and at least 10 amperes.

6. OPERATING YOUR WINE COOLER

6.1. Special Notice

- When you use the Wine cooler for the first time or restart it after having been shut off for a long time, there could be a few degrees variance between the temperature you set and the one indicated on the LED readout. This is normal and it is due to the length of the activation time. Once the Wine Cooler is running for a few hours, everything will be back to normal.
- The Wine Cooler should be placed in a position where the ambient temperature is between 16~32°C/60~90°F. If the ambient temperature is above or below this range, the performance of the unit may be affected. For example, placing your unit in extreme cold or hot conditions may cause interior temperatures to fluctuate. The range of 4~18°C/39~64°F (5~18°C/41~64°F for duo zone models) may not be reached

6.2. Control Panel (DX-16.46K, DX-20.62KF, DX-28.88KF)

LIGHT

To turn the inner light on/off.

UP

You could increase the set temperature 1 °C or 1 °F by pressing this mark.

DOWN

You could decrease the set temperature 1 °C or 1 °F by pressing this mark.

FAHRENHEIT OR CELSIUS DISPLAY

You could get Fahrenheit or Celsius temperature indicate if you touch the marks at the same time for 5 seconds.

6.3. Control Panel (DX-30.80DK, DX-46.128DK, DX-54.150DK)

LIGHT / FAHRENHEIT OR CELSIUS

To turn the inner light on/off. Press for 5 seconds to change between Celsius and Fahrenheit

UP

You could increase the set temperature 1 °C or 1 °F by pressing this mark.

DOWN

You could decrease the set temperature 1 °C or 1 °F by pressing this mark.

Compartment selector

You can select between upper and lower compartment when setting the compartment temperature.

Caution!

- DX-46.128DK and DX-54.150DK models ensure a maximum of 6°C difference between upper and lower compartments.

6.4. Control Panel Lock (all models), ON/OFF switch (DX-30.80DK, DX-46.128DK, DX-54.150DK)

- Your wine cooler is equipped with an AUTOMATIC control panel lock function. This function will prevent any unwanted changes to your temperature or power settings.
- The lock function will activate automatically 12 seconds after the last time a button is pressed on the control panel.
- To unlock the control panel, press and hold the **down arrow** button and **up arrow** button for 5 seconds, then the control panel will beep and blink. This indicates that the control panel is active and the settings can be changed.
- To switch the unit on or off, press the **LIGHT** and **COMPARTMENT SELECTOR** for 5 seconds.

6.5. Storage Capacity

You can place 16 (DX-16.46K), 20 (DX-20.62KF), 28 (DX-28.88KF), 30 (DX-30.80DK), 46 (DX-46.128DK), 56 (DX-54.150DK) bottles in this Wine Cooler (as indicated in your model's part number). Many bottles may differ in size and dimensions. As such the actual number of bottles you may be able to store may vary. Bottle capacities are approximate maximums when storing traditional Bordeaux 750 ml bottles and include bulk storage.

7. CARE AND MAINTENANCE

7.1. Defrosting Your Wine Cooler

The unit should be defrosted manually. The condensation collects in the drainage channel behind the rear wall of the unit, and the flows through the drainage hole into the drip tray by the compressor where it evaporates.

7.2. Cleaning Your Wine Cooler

- Unplug the Wine Cooler, and remove the Wine and shelves.
- Wash the inside surfaces with a warm water and baking soda solution. The solution should be about 2 tablespoons of baking soda to a quart of water.
- Wash the shelves with a mild detergent solution.
- The outside of the Wine Cooler should be cleaned with mild detergent and warm water.
- Wring excess water out of the sponge or cloth before cleaning the area of the controls, or any electrical parts.
- Wash the outside cabinet with warm water and mild liquid detergent. Rinse well and wipe dry with a clean soft cloth.

7.3. Vacation Time

- **Short vacations:**
Leave the Wine Cooler operating during vacations of less than three weeks.
- **Long vacations:**
If the appliance will not be used for several months, remove all items and unplug the power cord. Clean and dry the interior thoroughly. To prevent odor and mold growth, leave the door open slightly: blocking it open if necessary.

7.4. Moving Your Wine Cooler

- Remove all bottles.
- Securely tape down all loose items (shelves) inside your appliance.
- Tape the door shut.
- Protect outside of appliance with a blanket, or similar item.

7.5. Energy Saving Tips

- The Wine Cooler should be located in the coolest area of the room, away from heat producing appliances, and out of the direct sunlight.
- Overloading the Wine Cooler forces the compressor to run longer.

8. PROBLEMS WITH YOUR WINE COOLER?

You can solve many common Wine Cooler problems easily, saving you the cost of a possible service call. Try the suggestions below to see if you can solve the problem before calling the service.

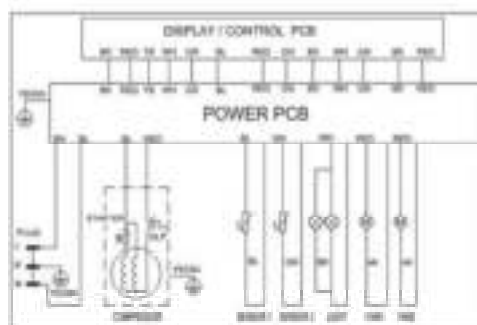

TROUBLESHOOTING GUIDE

| PROBLEM | POSSIBLE CAUSE |
|---|---|
| Wine Cooler does not operate. | Not plugged in. The circuit breaker tripped or a blown fuse. |
| Turns on and off frequently. | The room temperature is hotter than normal. The door is opened too often. The door is not closed completely. The temperature control is not set correctly. The door gasket does not seal properly. The Wine Cooler does not have the correct clearances. |
| Vibrations. | Check to assure that the Wine Cooler is level. |
| The Wine Cooler seems to make too much noise. | The rattling noise may come from the flow of the refrigerant, which is normal. As each cycle ends, you may hear gurgling sounds caused by the flow of refrigerant in your Wine Cooler. Contraction and expansion of the inside walls may cause popping and crackling noises. The Wine Cooler is not level. |
| The door will not close properly. | The Wine Cooler is not level. The door was reversed and not properly installed. The gasket is dirty. The shelves are out of position. |

Humidity Control

The appliance is equipped with a system for maintaining the correct level of humidity. Under extremely dry environmental conditions, you may have to add some water into the humidity box provided with your wine cellar. Fill the small plastic reservoir (humidity box) $\frac{3}{4}$ full with water, and fit onto the runners found on the top shelf of the appliance. Check the water level regularly and refill as necessary. Please ensure the reservoir is positioned correctly on the runners on the top shelf to avoid the possibility of water spillage.

■ This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.
