

Product introduction

Ultrasonic technology is a relatively mature technology in the world. It is widely used in various fields. Ultrasonic humidifier adopts ultrasonic high frequency oscillation principle. The water is atomized into 1.5 micron ultrasonic particles. The water mist is diffused into the air through the pneumatic device, so as to achieve the purpose of uniformly humidifying the air. Freshing air, moistening skin, improving health.

Product accessories list

Open the packing carton, please check the carton contains the following accessories:

Specification

Model	Bowl2.5
Voltage	AC220V/50Hz
Wattage	22W, PTC: 15W
Noise Level	<35dB (A)
Capacity	2.5L
Atomization time	Max rate: 120ml
Mist output	150-250ml/h
Net weight	1.40kg
Gross weight	1.70kg
Product size	255*170*210mm
Net No.	9H-915
Executive standard	GB4706.1-2005 GB4706.48-2009

Main Features

- Top Ring, convenient and efficient.
- Shut off automatically when waterless.
- Four gear rate adjustment.
- The spray is exquisite, can last for 12 hours.
- Sleep mode control, GPP spray.
- PTC heating function, can spray warm mist (optional).
- Touch key control.

Thank you for purchasing our air humidifier, please read this instruction carefully before use, please keep this booklet for future reference.
