

# 200mm wheels Lux Scooter

## Owner's Manual

Read and understand this entire manual before allowing child to use this product!

---

## SAFETY WARNINGS:

**▲ AN IMPORTANT MESSAGE TO PARENTS:** This manual contains important information. For your child's safety, it is your responsibility to review this information with your child and make sure that your child understands all warnings, cautions, instructions and safety topics. Razor USA recommends that you periodically review and reinforce the information in this manual with younger riders and that you are required to inspect and maintain your child's scooter to insure their safety.

**▲ GENERAL WARNING:** Scooter riding can be a hazardous activity. Scooters can, and are intended to move and it is therefore possible to get into dangerous situations and/or lose control and/or fall. If such things occur you can be seriously injured or die. LIKE ANY OTHER MOVING PRODUCT, USING A SCOOTER CAN BE A DANGEROUS ACTIVITY AND MAY RESULT IN INJURY OR DEATH EVEN WHEN USED WITH PROPER SAFETY PRECAUTIONS USE AT YOUR OWN RISK AND USE COMMON SENSE.

- Always wear safety equipment such as a helmet, knee pads and elbow pads. Always wear a helmet when riding your scooter and keep the chinstrap securely buckled.
- Always wear shoes.
- Ride on smooth, paved surfaces away from motor vehicles.
- Avoid sharp bumps, drainage grates, and sudden surface changes. Scooter may suddenly stop.
- Avoid streets and surfaces with water, sand, gravel, dirt, leaves, and other debris. Wet weather impairs traction, braking, and visibility.
- Do not ride at night.
- Brake will get hot from continuous use. Do not touch after braking.
- Avoid excessive speed associated with downhill rides.
- Adults must assist children in the initial adjustment procedures to unfold scooter, adjust handlebar and steering to height, and finally to fold scooter.
- Obey all local traffic and scooting laws and regulations.
- Watch out for pedestrians.
- Do not exceed 220lbs (100 kgs) total weight on the scooter.
- Do not allow children under age eight (8) to use the scooter. All children and preteens should ride with adult supervision at all times.
- Rider weight does not necessarily mean a child's size is appropriate to fit or maintain control of the scooter.
- A parent's decision to allow his or her child to ride this product should be based on the child's maturity, skill and ability.
- Refer to the section on safety for additional warnings.

## ACCEPTABLE RIDING PRACTICES AND CONDITIONS

Direct parental supervision is required. Scooters are meant to be used only in controlled environments free of potential traffic hazards and not on public streets. Do not allow your child to ride a scooter in any areas where vehicle traffic is present. The child must maintain a hold on the handlebars at all times. Never allow more than one child at a time to ride a scooter. Never use curbs, steps, sloped driveways, hills, roadways, alleys or swimming pool areas. Keep fingers and other body parts away from the product when folding or unfolding. Adults must not allow children to assist in folding or unfolding the scooter.

Do not ride a scooter in wet weather. Scooters are intended for use on solid, flat, clean and dry surfaces such as pavement or level ground without loose debris such as rocks or gravel. Wet, slick or uneven and rough surfaces may impair traction and contribute to possible accidents. Do not ride a scooter in mud, ice, puddles or water. Avoid excessive speeds that can be associated with downhill rides. Never risk damaging surfaces such as carpet or flooring by use of a scooter indoors. Do not ride at night or when visibility is impaired.

## PROPER RIDING ATTIRE

**▲** Always ensure child is wearing proper protective equipment such as an approved safety helmet. A helmet may be legally required by local law or regulation in your area. A child should always wear shoes, never ride barefooted or in sandals, and keep shoelaces tied and out of the way of the wheels.

FAILURE TO USE COMMON SENSE AND HEED THE ABOVE WARNING FURTHER INCREASES RISK OF SERIOUS INJURY. USE AT YOUR OWN RISK AND WITH APPROPRIATE AND SERIOUS ATTENTION TO SAFE OPERATION. USE CAUTION.

**▲ WARNING: ALWAYS INSPECT THE SCOOTER PRIOR TO RIDING.** Properly inspecting and maintaining your scooter can reduce the risk of injury. Always inspect your scooter before riding and regularly maintain it. **WARNING: CHECK LOCAL LAWS REGARDING SCOOTER USE.** Check local laws and regulations to see where and how you may use your Razor scooter legally. In many states and local areas scooter riders are required BY LAW to wear a helmet. Check local laws and regulations regarding laws

## BEFORE YOU BEGIN

Remove contents from box. Remove the foam separators that protect the components from damage during shipping. Inspect the contents of the box for scratches in the paint, dents that may have occurred during shipping. Because your scooter was assembled and packed at the factory, there should not be any problems, even if the box has a few scars or dents.

### Required Tools (key wrench)

We recommend the use of mechanic's grade tools.

**SET UP AND USAGE INSTRUCTIONS:**  
**UNFOLDING THE SCOOTER FOR FIRST TIME USE.**

1. Insert and secure the left and right handlebars by pressing the spring-loaded buttons and inserting them into the T-tube.

2. Make certain the spring-loaded button engages the hole in the T-bar for each handlebar.

3. To release the folding mechanism, hold the T-tube with one hand between the collar clamp and the quick-release lever and place your foot on the deck plate. With the other hand, pull the joint lever up to release the steering column from the locked position and allow you to pivot it to the upright position.

4. The Joint lever is spring-loaded and will automatically lock in the upright position when fully upright.

5. To adjust the height of the handlebars, unlock the extension tube by pulling outward on the quick-release lever and pushing the button located on the extension tube. Slide the T-tube to the desired position and secure by pushing inward on the quick-release lever.

6. The tension of the quick-release lever can be adjusted by tightening or loosening the allen bolt. Be careful not to over-tighten. You should always be able to open and close the quick-release lever by hand and the T-tube should slide freely with the quick-release open.

**CHECK BEFORE RIDING**

**Collar Clamp**

(Using the 5mm Allen wrench, check that the collar clamp bolt is tightened securely. This item is tightened and quality inspected at the factory, but there is a slight chance that the effects of shipping or handling may have caused this bolt to loosen.
