Introduction

Thank you for purchasing the Devine PRO 5000 monitor headphones. These cost-efficient headphones are designed for studio monitoring applications and are equipped with many beneficial features.

The special design of these headphones ensures a universal fit thanks to the automatically adjustable headband. The comfortable, lined over-ear pads ensure that even when wearing the headphones for an extended period of time, they will remain comfortable.

The closed-back construction of the ear pads ensures that most of the ambient noise is kept to a minimum. This makes recording and playback monitoring much easier. Also, your immediate environment won't be disturbed if you're listening to music at a higher volume level.

Before unpacking all the received items, carefully read this manual to familiarise yourself with the functions of these headphones. Also, check the contents of the box to make sure all the necessary parts are included (see the **Box contents** section of this user manual). If the headphones fail to operate properly, or if you encounter any problems while using them, disconnect them immediately and contact your local dealer for more information and help.

Box contents:

- Devine PRO 5000 headphones
- mini jack to stereo jack plug screw-on adapter (already attached, can be detached from the main plug)
- 1 coiled cable, +/- 1.5 metres long
- 1 straight cable, +/- 3 metres long
- 1 hard case
- 1 hard case strap
- 1 set of firm ear pads (soft ear pads already attached)
- Do not open the housing of the headphones. There are no user-serviceable parts inside.
- Keep the headphones away from intense sunshine, humidity, dust and liquids.
- Avoid impacts, large amounts of weight, collision and repeated movement of the hinges.

 	<p>WEEE: Dispose of this product properly. This product is part of the WEEE directive – the Waste Electrical and Electronic Equipment directive. The requirements stated in this directive apply to all manufacturers and producers of electronic equipment in the EU.</p> <p>Do not dispose of this product together with regular household rubbish. Contact your local government representative for more information about proper disposal and recycling of electronic products in your region. By recycling this product properly after use, we can work together to enjoy these products and protect our environment from pollution.</p>
	<p>CE: The CE mark indicates that the product complies with applicable European directives and regulations.</p>
	<p>Indoor use only: This device is designed to be used indoors only. The maximum ambient temperature should not exceed 40 degrees Celsius (104 degrees Fahrenheit)</p>

WARNING:

These headphones are capable of producing high volume levels, which may cause permanent hearing loss if used improperly. Devine recommends keeping the volume of these headphones at a moderate level.

Please note that the PRO 5000 is capable of producing audio levels of over 90 dB, while the threshold of possible hearing damage is 80 dBA. When using these headphones for an extended period of time at a moderate or high volume level, be sure to take a break every hour to prevent fatiguing, hearing loss and/or impairment in the future.

Devine can not be held responsible for any damage or injury caused by improper use of this product.
