**CODINGLAB ERP MINI™** is the spin-off of tested technologies by **ENFINO®**, used in schools globally to teach robotics and programming. This gadget version has advanced features and comes with a manually programmable controller that can also be connected with bluetooth to smart devices or with a USB port to a PC. It is programmable with the **KEIRO™** software and allows full reconfiguration to create robotic models and includes 2 Infrared distance sensors with 2 motors.

Product Code:  
**ROB20**
