Brief Introduction

Tips of glue (The picture is for reference only.)

- 1.White latex is used for small wooden pieces. (It needs quite a long time to dry.)
- 2.Liquid glue is used for big wooden parts and other materials.
- 3.Don't use too much glue in case that it will require longer time to dry as well as affect the outward appearance of the product.

Tips of fabric

- 1.Cut the fabric according to the instruction.

E.g.

Tips of LED

1. Pay attention to the positive & negative electrode of cell.
Yellow wire: positive.
White wire: negative.
2. In cell box:
Red wire: positive.
Black wire: negative.
3. Test the LED after combination.

Warning

1. Children must use under the guidance of adults.
2. Put the remains back in the original bags after each step completed. (In case of missing).
3. Dimensions in assembly steps shown in millimeter.
4. According to the [Part number explanation] at the end of this page, find the real part based on the part illustration and check the size carefully. Start to assemble after verification. (Only for wooden parts.)
