

Magnetar Insturction Manual

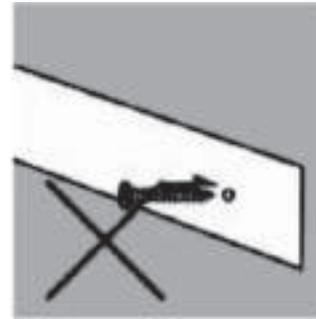

1. Pull the plastic separator out tightly and carefully, and separate the backing from the magnetic knife bar vertically to prevent injury.

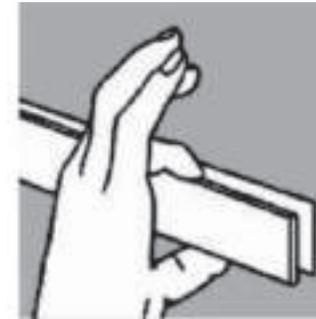

Be careful of the magnetic force from the magnetic knife bar to the backing, as it can cause injury to your finger or hand.

Screw the backing into the wall.

This is the wrong way.

3. Cover the backing carefully.

Due to the strong magnetic force, be careful of your fingers and hands when covering the backing.
