

Filter danger for you

Overcurrent, overvoltage, overtemperature, short circuit multiple protection functions Safe and fast charging

Overcurrent protection
Prevent excessive charging current

Overvoltage protection
Prevent excessive charging voltage

Over temperature protection
Prevent excessive charging temperature

Overpower protection
Prevent excessive charging power

Undervoltage protection
Prevent charging voltage from being too low

Short circuit protection
Automatically cut off the circuit when short circuit

Electromagnetic protection
Prevent external magnetic field interference

Foreign body protection
Can only recognize mobile phone charging

Overcharge protection
Fully automatic protection
