

- for those times when even the best sealant (*that is to say, ours...*) won't seal a big puncture or slice.

Totally compatible with all sealants, but especially awesome with Magic Milk™, this kit won't weigh you down. Only 28g / 1 Ounce – it's the <lo-fat> plug kit, with all you need in a lightweight tube.

No need to rout out the hole: the double-prong tool applies the 3.5mm or 1.5mm super-sticky sausages – our 'Flat-Fixing Frankfurters' – and seals up the damage.

Perfect with

- The World Champions' Tubeless Sealant:

NOW,  
welcome our new  
Magic product:

FLAT-FIXING!  
FRANKFURTERS!

**OKO**  
**Magic Plug**

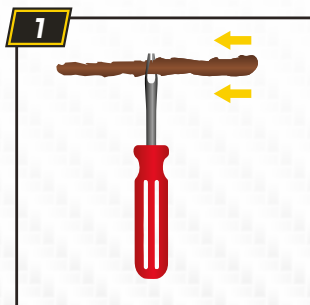

**Your kit includes an application tool, 3 big plugs and 5 small ones, to fit all needs:**

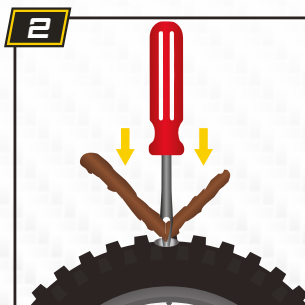

when you need more, the Refill Packs (10 x 3.5mm or 5 x 1.5mm plugs) will keep you safe.

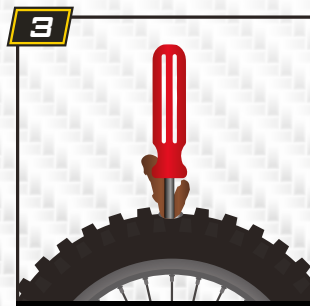

## 5 EASY STEPS:

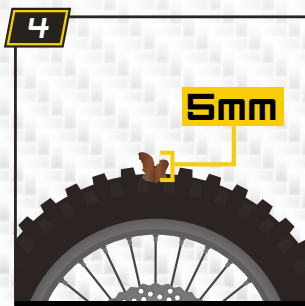

Load up the tool from the side, squeezing the end of the sausage then pulling it through the prongs halfway.

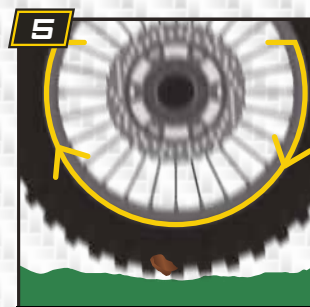

Press the prongs into the hole.

Leave around 5mm of each end of the sausage visible, to keep the plug in place: the ends will press against the tyre when you ride

Hold the ends tight and pull out the tool.

Reinflate with a CO2 canister (or track pump if at home).

And you're back on track – or the trail...

**FLAT-FIXING! FRANKFURTERS!**

And isn't it good to know that **there are no nasty metals in our plugs:** what's more, like all our OKO Magic products, the 'frankfurters' are made with synthetic latex – **no rainforests were harmed in the making of these plugs...**
