SAFE SIZING FOR JUVENILE AND SIDEWALK BICYCLES

It is assumed that the bicycle you have bought is sized correctly for the user. Some parents make the mistake of buying a bicycle too large for the intended rider, resulting in a "growing into" it. There should be a minimum of 1 inch clearance above the highest point of the top tube when the child is standing the bicycle on level ground. (See drawing below.)

WARNING

Parents should take the responsibility to guide and supervise the kids when using the bike to ensure the safety of the kids. Parents should read the rules to ensure they are well tightened before each ride. Your child always wears an approved bicycle helmet when riding. Before every ride, make sure that your bike is in safe operating condition. If you notice any problems with the bike, do not allow the child to ride. If you notice any problems with the bike, do not allow the child to ride. If you notice any problems with the bike, do not allow the child to ride.

IMPORTER:

BEFORE USE, PLEASE CHECK AND MAKE SURE THE BIKE IS COMPLETELY ASSEMBLED AND IN GOOD CONDITION. IF YOU NOTICE ANY PROBLEMS WITH THE BIKE, DO NOT ALLOW THE CHILD TO RIDE OR BROKEN.
