

KOFIRE

# UG-05

Professional wireless gaming headset +  
gaming low-latency transmitter

Compatible with multiple gaming consoles

## 3D stereo sound (3D立体音效)

According to the interactive scene of the playback source and the change of the sound source, it outputs correspondingly changed sound effects, producing extremely realistic 3D positioning sound effects and bringing a real listening experience.

## Dynamic EQ sound quality supplement (动态EQ音质补偿)

Automatically adjust EQ sound effects during listening to music, playing games or multimedia playback, to achieve immersive sound effects and continuous good sound output at a low volume.

## Low-latency gaming (低延迟游戏)

45ms low-latency game chip, audio and video synchronization and surround sound allows you to easily identify the enemy's position and take advantage of the opportunity

## Pluggable high definition microphone (可插拔高清麦克风)

Automatically adjust EQ sound effects during listening to music, playing games or multimedia playback, to achieve immersive sound effects and continuous good sound output at a low volume.

## Multiple connection mode options (多种连接模式)

1. Use with Bluetooth mode, which can turn on RGB light and vibration mode
2. Use with transmitter, which can turn on RGB light and vibration mode
3. Use with 3.5mm cable, which can turn on vibration mode
