of replacing the key with a tool. Move
of red line B by using a tool.

Hold the lock in your left hand, use one or two fingers to press the wrench
hard, take a lock tool and turn the wrench with your fingers gently. When
the position of pin A reaches the position of red line b, it can stay still, and
such strength is just right. Please note to remember this feelings from you as
it is the force you need. Keep both hands with proper force and speed.
Patience is especially important in this step. You have to pay attention to how
padlock pin operates under the control of the lock tool. Unlocking is a patient
and meticulous job that you must clear to understand the purpose of each
step.
