

# Specification

- Item# BR141
- Battery-type Sucking Stimulator
- Sucking: 10-Speed
- Material: ABS
- Battery: 2 AAA batteries
- Dimension: 123\*38\*37mm
- Color: purple
- Weight: 54g

# General Description

A clit-sucking vibrator works by using a combination of air, suction, and a little vibration to deliver orgasms on the fly. Companies like Womanizer and Satisfyer are the leading brands of the moment, making some of the best toys on the market. Some women have even reported having orgasms in less than sixty seconds.

A clit-sucking vibe looks a bit like one of those ear thermometers doctors use on children. It's shaped like the number 8 with a nozzle on the top. This nozzle goes over the glans clitoris (the part on the outside of the labia). It then suctions onto the clit with a variety of optional patterns.

# Components List

No.	Components	No.	Components
1	ABS housing A-front	8	ABS sucktion holder
2	ABS housing B-back	9	Screws
3	ABS housing C-battery cover case	10	Motor
4	PCBA	11	Silicone Sucktion
5	Metal plate for "-"	12	Silicone Button
6	Metal plate for "+"	13	Plastic spindle
7	Metal plate

# Instructions for Use

1. Clean the product with warm water and soap, or toy cleaner before and after use.
2. Use caution when cleaning vibrating or motorized products. Moisture in the battery compartment can cause malfunction.
3. Only use a water-based lubricant unless otherwise specified. Oil-based lubricants may damage certain materials.
4. Thoroughly read and follow any instructions listed on/in the packaging of the product before use.
5. For suction products, be sure to familiarize yourself with the air release feature on your product before use.
6. Do not use force with your product.
7. Keep the product in a clean, cool and dry place. Do not expose to direct sunlight.
8. Keep the product separated from other products made with different materials to avoid any chemical reactions.
9. Be sure product is fully inserted before activating.
10. Be sure product is turned off before removing.
11. Allow vibrating or motorized products to cool down after use and before storing.
