

# Rubbatech

**PROTECTION NEVER LOOKED THIS GOOD**

Rubbatech protection pads are all individually hand made from an ultra strong and durable rubber, with extremely high abrasive resistance and UV stability. We strive to produce a product that does not only give maximum and effective protection, but also with unique styling and non ageing appearance. All Rubbatech pads use a clear PVC application tape, with a glue stability range from -10C up to 100C.

For any queries or feedback, please contact us at

## INSTRUCTIONS

- **NB - Clean surface thoroughly with benzine or degreaser to ensure surface is free from greasiness, polish or silicone residue.**
- Without removing backing paper, place Rubbatech pad in position and make reference points.
- Remove backing paper and lightly position pad in place (avoid finger contact with application glue).
- **NB - Start by applying pressure in centre of pad and gently work your way outwards to avoid creasing and trapping air underneath.**
  - **DO NOT pull or stretch pad.**
- When stuck in place, apply firm pressure all round by rubbing with a soft cloth, especially on all the corners and edges.

## CARE

- Do not use pressure washer directly on pad.
- Any dash/rubber treatment will remove scuff marks and keep pad looking great at all times.

We believe you will have many happy kilometers with  
Rubbatech
