

Please notice:

Different wall materials require different types of screws/wall plugs as they can carry different loads. Therefore, use screws/wall plugs which are suitable for the walls in your home (screws/wall plugs not included). If in doubt, ask a builders' merchant/DIY store for advice on which screws and wall plugs to use.

When dismantling the rack, the steel plug can be easily removed by sticking tape to the end of the plug. Then screws etc. can be removed from the wall again.
