YND-1200D

YND-2000D

Thank you for purchasing this
please read the manual carefully

1. Please do not use the remote control in a bath or in a shower room or in a bathtub.
2. When used in wet or a long time, please take care the battery to avoid the leaking leakage
3. When repairing the battery of the remote control, please replace it according to the
assembly diagram on the back of the remote control.

Simple Troubleshooting

When the heater does not start:
Please check whether the power cord plug into the socket;
Whether the power switch on the back of the machine;
Whether the power socket is connected to the power;
When operation noise: check whether the machine is placed on the ground is
level, whether shaking;
When the time is too short and on: check whether the air inlet and outlet are blocked
(curtains, plastic bags, pieces of paper, etc.), eliminate the factors and then
restart the machine and start again.
When the above checks fail to exclude the fault, please contact the local after-sales
service center, do not dismantle the machine for repair without authorization to avoid

Maintenance

When cleaning, please turn off the power and unplug the power supply.
Please clean the heater to cool completely before wiping the outer surface with a wet soft
cloth. Do not use a hard brush to brush the ventilation holes.
Please clean the heater until the machine is completely dry before powering on and using.
Please store the heater in the original packaging, and place in a dry and ventilated environment.
