

LET EVERYONE HAVE A QUALITY SLEEP

MATTRESS

**INSTRUCTION
BOOK**

§1/Setting Up

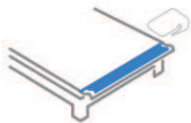

Unbox

Lay the box on its side and open it.

Unwrap

Once your mattress is unfolded, cut the inner plastic wrap with the mattress opener.

Position

Put your rolled up mattress on the right place. And remove the outer plastic film.

Expand

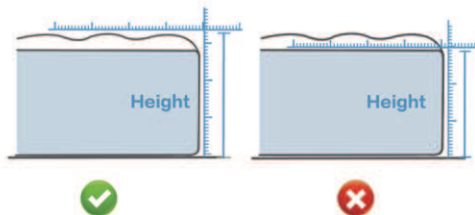

Allow your mattress to fully expand with 72 hours.

TIP: Measure Correctly

First, the mattress needs about 48-72 hours of natural expansion to reach the ideal state.

When measuring, gently press the ruler on the mattress, making sure it contacts the highest point of the mattress. Then, use another ruler perpendicular to the bottom of the mattress to measure the distance from the bottom of the mattress to the horizontal ruler. This is the correct height of the mattress.

• TIPS2

- ① Being sealed in plastic packaging sometimes traps odors. After unwrapping, allow product to air for several hours.
- ② Due to machine-cutting manufacturing processes, there may be slight variances in the dimensions of this product.

• What if my mattress does not expand to its full size?

- ① Please make sure that the mattress has been put on a platform for 72/48 hours to expand fully.
- ② Warm the room up to at least 20°C (68°F). If the mattress still hasn't expanded fully after 72/48 hours, please move on to step 3.
- ③ Loosen up your mattress by rolling on the mattress for 10 – 30 minutes.

§2/Product Description

Our Mattress

Thanks to the pocket spring core, it provides excellent support and air circulation. The 7 ergonomic lying zones ensure that your shoulders, back, and hips sink optimally into the mattress. The 4D breathable fabric layer effectively regulates temperature and promotes air circulation, maintaining a dry sleeping environment. Therefore, you can enjoy a good night's sleep night after night and wake up refreshed.

§3/Solves 5 Key Sleep Problems

We feature state-of-the-art materials in each of our mattress to improve your sleep quality. We help you and your family get an all-around better, deeper night's sleep.

Relieve fatigue

Relieve soreness

Relax muscles

Prolong sleep with cool foam

Reduce tossing and turning

\$4/Care & Clean Instructions

Gentle cycle

Do not tumble dry

Do not iron

Do not dry clean

Do not bleach

- Avoid repeated sitting in the same spot on the edge of the hybrid mattress.
- Avoid bending or jumping on your mattress.

• What if I spilled some liquid on my mattress?

For water, please quickly soak up all liquid with dry towels or tissue paper. Then let your mattress dry completely, preferably in direct sunlight.

If the liquid has a strong odor or dark color, sprinkle baking soda directly on the wet area. If the stain has dried, spray some water on the stain first, then sprinkle the baking soda over the top. Then, rub the mixture into the mattress. Regardless, let your mattress dry completely. Then, vacuum up the baking soda.

• How to get mildew stains off my mattress?

- 1 Mix an equal amount of rubbing alcohol and warm water in a container.
- 2 Dip a clean cloth into the mixture, wring out the excess, and run the stain in a circular motion.
- 3 Rinse the area with a cloth dampened with water.
- 4 Place the mattress out in the sun to dry out and to prevent more mold from growing.

\$5/Warranty

- 1 This product comes with a 30 day limited replacement warranty for manufacture's defects.
- 2 A return would only be eligible after sleeping on your mattress for a minimum of 14 nights. It usually takes 2-4 weeks for your body to adapt to a new mattress. If you are not satisfied after that, you may initiate a return within 30 nights of purchase by contacting us.

The warranty applies to only the original purchase and the following situations are not covered:

- 1 Physical abuse or damage to the structure and/or cover material, including but not limited to burns, cuts, tears, liquid damage, or stains.
- 2 Normal changes in softness or resilience.
- 3 Improper maintenance, alteration, or repair by unauthorized sales representatives.
- 4 Comfort preference.
